

# Ushering in The AMI<sup>plus</sup> Era

The move to AMI held the promise of digital transformation and the advance of the smart grid. Are you fully leveraging the awesome value of your AMI data stream? Is the AMI data now intrinsically part of your business? With Trynzc, it will be.

## UNLOCK YOUR DATA BY UPGRADING TO IOT-ENABLED OPERATIONS

Trynzc's flexible, secure business operations software, GridOps, powers real-time event-driven work with the IoT data stream. Our IoT platform for Utilities brings the power of near real-time event detection, enhanced problem diagnosis, and business process automation to energy distribution operations.

### SENSE

Detect and prioritize the dozens of anomalies within millions of data points, in near real-time. Leverage your AMI and line of business data streams, affordably.

### TRIAGE

Rapidly achieve situational awareness of events within a single pane of glass enriched with current and historical meter data.

### ACT

Facilitate and automate your organization's business processes with workflow designer, case management, collaboration, and cross-system orchestration.

## The **Smart Grid** The Way It Was Meant to Be

GridOps brings your grid management, employees, and workflows onto one platform and ushers in the era of AMIplus. Run-to-fail is dead. With GridOps, Sense, Triage & Act is here.

## We Are Trynzc

Our vision is simple. To bridge the gap between AMI / IoT data and smarter business processes. Our GridOps platform is the premier IoT platform for event-driven work.

### A PATH FORWARD FOR UTILITY COMPANIES

AMI and IoT have created a massive opportunity for utilities - the end of the “run-to-fail” service model. By harnessing the data created by AMI, we can change service delivery and grid management into something more intelligent, streamlined and predictive.

Trynzc delivers the shortcut to smarter, more efficient service delivery through our cloud-native GridOps platform, ushering in the AMIplus Era.

## Achieve Digital Transformation & Unlock the Value in your AMI Data Stream

Real transformation is more than just new software. It's software that improves your business processes and empowers your people. With Trynzc you can reduce operational costs, timely and accurately identify priority service delivery issues, empower your employees to innovate, and ultimately find new ways to increase stakeholder value.
